

CÖnVita™

FOR HEALTHY CONSTRUCTION

CÖnVita A Green Building Product obtained from Bio-Polymer Resins .

CÖnVita is free-flowing and water-soluble off-white powder.

CÖnVita can enhance the mortar adhesion, cohesion, and bonding strength.

It also improves workability, durability, abrasion resistance, wear resistance, and load-bearing capacity.

CÖnVita also enhances the mortar's wetting and water-retention property

Material	Redispersible Cellulose Fibers
Appearance	Off White powder
Active ingredients	80- 85 %
Cellulose Fibers contents	6 % to 8 %
Total Solid Contents	upto 95 %
Moisture contents	upto 5 % Max
PH	6.8-7.0 (1% water solution)
Sieve Analysis	255 mesh passes
Viscosity	4600 CPS in 10 min 5800 CPS in 24 Hrs (1% water solution)

Applications

**As Concrete / Waterproofing additive, Bonding/ Internal Curing Agent
For Repairs /Screed/Plaster ,Cement mortars**

Wherever Cement used CÖnVita will improve the quality of Construction

Pack : 125gm Pouch

Dosage: 125gm per Bags of 50bag of Cement
